
Climate change

Target 7.2. By 2030, increase substantially the share of renewable energy in the global energy mix.

Target 7.3. By 2030, double the global rate of improvement in energy efficiency.

Target 9.4. By 2030, upgrade infrastructure and retrofit industries to make them sustainable, with increased resource-use efficiency and greater adoption of clean and environmentally sound technologies and industrial processes, with all countries taking action in accordance with their respective capabilities.

Target 9.5. Enhance scientific research, upgrade the technological capabilities of industrial sectors in all countries, in particular developing countries, including, by 2030, encouraging innovation and substantially increasing the number of research and development workers per 1 million people and public and private research and development spending.

Target 13.1. Strengthen resilience and adaptive capacity to climate-related hazards and natural disasters in all countries.

32 Climate-related risks

33 Impact assessment

34 Utilization of associated petroleum gas

35 Investments in renewable energy

36 Energy efficiency and energy conservation
